EDUCATION

KIET Group of Institutions   **Delhi NCR, Ghaziabad**

Bachelor of Technology   **Expected May 2025**

Major in Electronic and Communication Engineering

Cumulative GPA 7.14

Relevant Coursework : Software Engineering, Operating system, Android Development, Backend development

INTERNSHIP EXPERIENCE

Broki Services Pvt. Ltd.   **Noida, Uttar Pradesh**

Software Engineer Intern / *In-office*   **Oct 2024 - Present**

- Developed and optimized cross-platform applications, enhancing core functionalities and streamlining onboarding processes, leading to a 5x faster account setup completion rate and improved user satisfaction.
- Facilitated seamless collaboration between design and engineering teams to align front-end and back-end integrations, reducing bug reports by 40% during testing and accelerating product release timelines.

Specstem Digital Pvt. Ltd.   **Hyderabad, Telangana**

Backend Developer Intern | Remote   **Nov 2023 – Feb 2024**

- Engineered scalable backend systems with Node.js and Express framework, optimizing API response time by 30% and managing over 500+ concurrent requests, ensuring seamless user experience.
- Streamlined cloud infrastructure by deploying AWS EC2 instances and implementing robust IAM policies, resulting in a 15% reduction in system downtime and improved security compliance.
- Leveraged Visual Studio Code features and automation tools to boost coding productivity by 10%, reducing overall development time for key projects.

PROJECTS

Barber Slot Booking App (OnClick)   **Ongoing**

Flutter, Node.Js, Bloc, MySQL(SQL)

- Built real-time notification systems using Firebase Cloud Messaging for appointment reminders, boosting user engagement by 30% and reducing missed appointments.
- Integrated geolocation services to deliver location-based barbershop recommendations, enhancing user experience and improving search efficiency by 30%, resulting in higher user retention.

End to End Job Portal   **3 Weeks**

Node.js, MongoDB(NoSQL), Linux, AWS EC2, BullMQ

- Developed robust server-side applications using Express.js to handle user authentication, managing over 1,000+ user registrations and scaling for growth.
- Implemented secure user authentication workflows, including registration, login, and password reset functionalities, enhancing system security and user management efficiency by 40%.
- Optimized asynchronous task handling with BullMQ, increasing processing speed by 40%, reducing latency, and improving overall application performance.

CERTIFICATIONS

Flutter Development   *Udemy*

State Management, Connecting with Backend, Using Native Features   **Jan 2024 – Mar 2024**

Backend Development Using Node.Js   *Udemy*

Mastered Essential Backend Concepts and Created Several Projects   **Sep 2023 – Jan 2024**

Data Structures and Algorithms   *Programming Pathshala*

Solved over 400+ problems across several platforms   **Feb 2024 – May 2024**

VOLUNTEERISM

School of UI/UX   *Feb 2023 – Present*

Vice President: Managed a team of 30 club members and conducted weekly meetings to track progress

Wooble IdeaSphere   *May 2024*

Achieved Runner-Up in a nationwide product idea and prototyping competition with 400+ participants

Where Business Meets Technology   *Oct 2024*

Achieved Runner-Up in a business and technology competition, demonstrating innovation and strategic thinking skills among participants
